Konkuk University (Seoul, South Korea)

April 2016

International Trade Certificate

WORK EXPERIENCE

Inhouse Orders – Product Owner & Software Engineer

April 2019 – Present

- Led a startup team to build a complex product suite for key functionalities such as online ordering, reservations, payments, restaurant SEO, and reporting using NodeJS, Angular, NextJS, Ionic and more
- As product owner, prioritized product backlog and crafted user stories to maximize value
 - Used combination of Jira and Github
- Deployed a multilingual dashboard application available in Android, iOS, and web
- Built payment solution to process over one million dollars of monthly revenue
- Managed CI/CD pipeline backed by end-to-end functional testing suite using Jest, Selenium and Postman

Worldpay - Business Analyst Automation Engineer

May 2019 – May 2020

- Created a KPI dashboard for reports that would take days to compile by hand on a quarterly basis
- Built a centralized data visualization dashboard using .NET CORE, ASP.NET, Python, SQL, and Tableau
- Worked closely with database team to normalize and unify data from various legacy sources
